

Fortrose

Experience Better Living

Stoves

The Fortrose Optimyst electric stove combines traditional stove styling with an incredibly realistic flame effect, creating a welcoming centrepiece for your home. Finished in elegant anthracite with two opening doors, its classic design works beautifully in both modern and period interiors. Powered by Dimplex's patented Optimyst technology, Fortrose uses water vapour and light to create a realistic 3D flame and smoke effect. Enjoy the look of a real fire without the mess of a traditional fire or the need for a chimney.

When you want extra warmth, choose between 1kW and 2kW heat settings, or enjoy the flame effect independently without heat. The included remote control makes it easy to adjust the flame effect and heating from the comfort of your seat, while manual controls on the stove give you another simple way to operate it. Designed to be enjoyed throughout the year, Fortrose combines the character of a traditional stove with the convenience of electric heating and a flame effect you can enjoy whenever you choose.

- **Patented Optimyst technology** - creates ultra-realistic flames using water vapour and light, for a truly lifelike fire experience
- **Easy refill** - the discreet water tank is accessed by the opening doors and provides 8-10 hours of continuous flame and smoke effect before refilling is required
- **Classic stove styling** - elegant anthracite finish with a traditional opening doors for an authentic stove look
- **Designed to fit your home** - the freestanding design gives you the freedom to place your stove within an inglenook, on a hearth or against a flat wall, with no chimney required
- **Comfort at the touch of a button** - use the remote control to adjust the flame effect and heat settings without leaving your seat
- **Year-round enjoyment** - use the flame effect independently of the heat to enjoy the ambience of a fire in every season

Optimyst flame technology

This unique flame effect is generated by an innovative combination of water vapour and light
